Goals for EVAA

Taking into consideration fact that one of the main aim of EVAA is to promote Veteran Athletics sport with particular emphasis on Eastern Europe. I am convinced that being a Pole I can be a kind of platform for development of this direction between West and East Europe. Thus will be my goal, to continue this direction, especially during organization of the next athletic veteran's events. I can assure that my knowledge about organization, accommodation and transport issues during veteran's championships is very solid. Having in perspective organization the next European Championships in Zittau, Hradek and Bogatynia and the European Championships in Bydgoszcz in 2014 eventually the World Master Athletics Championships in Bydgoszcz in 2015. I am confident that my work for EVAA will be very useful and important with establishing closer work with affiliates.
